

Toronto FIR Preferred IFR Routes

Preferred Route Tables:

- Flights Departing Toronto FIR: Page 2
- Flights Arriving Toronto FIR: Page 8

This document lists the preferred IFR routes for aircraft departing from or arriving at airports within the Toronto FIR. Preferred IFR routes are not mandatory, but represent a best practice for ensuring efficient traffic flows within the Toronto FIR. Aircraft filing preferred routes are less likely to receive amended routings, either while on the ground or in the air.

The preferred routings list is broken up into 2 sections, first for flights departing airports within the FIR, then for arrivals at airports within the FIR. (If you are departing and arriving within the FIR, check the departure list first for your departure airport. If it isn't in the departure list, then check the arriving list.)

To find a preferred routing for departure, look in the first column for your departure airport, then the second column for your destination/direction of flight. The third column will contain the preferred route.

To find a preferred routing for arrival, look in the first column for your arriving airport, then in the second column for your point of departure/direction arriving from. The third column will contain the preferred route.

Some combinations of departure/arrival airport may have multiple routes listed. The last 3 columns provide guidance on who each route is intended for.

- Alt = Altitude: >190 means FL190 and above. <160 means 16,000 or less. (FL starts at 180.)
- Typ = Type: (J)et or (P)rop
- Rmks = Remarks: Speed restrictions (eg. >250kts), Single engine aircraft, or other misc. remarks.

If there is no preferred route published for your flight, use your best judgement to plan a route that conforms to other nearby traffic patterns. If in doubt, ask a controller. We will gladly help you select routings within our airspace that maintain an efficient flow of traffic.
